Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders. All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation right. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data-bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. How to Plan, Speak and Write About It

Foreword by S. Lock

1985. XII, 184 pp. 55 figs. Softcover DM 40,-
ISBN 3-540-13992-3

Unique from start to finish! The chapters cover in sequential order the planning stage, funding, researching, statistical analysis, visual presentation and write-up. Although most of the authors are doctors of medicine, **Research** will help everyone undertaking or publishing work in any branch of science.

"All aspiring medical research workers should have access to this beautifully written and very practical book."

Nature

"The true gem of the collection is a chapter entitled 'Speaking at Meetings.' As a speaker and a listener, I propose that this piece be placed on the required reading list for scientists, educators, committee chairpersons, and anyone else who dares stand before an audience."

Dictionary of Abbreviations in Medical Sciences

With a list of the most important medical and scientific journals and their traditional abbreviations

Foreword by W. Forth

1989. VIII, 287 pp. Hardcover DM 61,-
ISBN 3-540-50487-7

This lexicon is a comprehensive collection of medical abbreviations and acronyms. Terms as of 1988 are included, especially from the rapidly changing fields of cardiology, immunology and genetics.
The purpose is not to promote the use of abbreviations, but rather to give assistance and improve understanding of acronyms commonly and increasingly occurring in current scientific literature. The approximately 20,000 entries were carefully selected to include items which might cause confusion when reading the literature or attending medical-scientific meetings.
An additional advantage is the Appendix containing the official abbreviations of some 500 leading medical journals. These notoriously cause difficulties for researchers citing scientific literature or references.
This lexicon is the ideal quick reference for the desktop of every clinician, researcher, or editor in the medical sciences.
